DETAILED ACTION

1. The Office action that follows is after a Pre-Appeal conference discussion held on June 29, 2007.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 11 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Ngo U.S. Patent No. 6,263,247.

Regarding claim 11, Takeda discloses an impedance matched circuit comprising an interconnect (i.e., transmission line) for connecting to a write head (L), at least one resistor (R10, R11) between a control voltage (Vcc) and the interconnect for impedance matching to the interconnect (column 1, lines 37-58), and means for shunting (C10, C11) at least a portion of the current that would otherwise pass through the at least one resistor during an overshoot mode (column 4, lines 21-59).

Regarding claim 17, method claim 17 is drawn to the method of using the corresponding apparatus claimed in claim 11. Therefore method claim 17 corresponds to apparatus claim 11 and is rejected for the same reasons of anticipation as used above.

Allowable Subject Matter

4. Claims 1-10 are allowed.

Reasons for allowance are as discussed in the previous Office action mailed October 30, 2007.

5. Claims 12-16 and 18-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
